MAY 30 2007*

Copies of both the Original Certificate of Correction and the Form PTO-1050 sent with Patentee's original request are enclosed.

Since this error is believed to be the error of the Patent Office, the new Certificate of Correction should be

## (37) ABSTRACT

A process for estimating successive values of digital symbols which can each take  $M$  different possible values, on the basis of the successive values of digital samples each of which results from the combination of at most  $L$  successive symbols. This process includes a stage by stage progression through a trellis of the Viterbi type with  $M^k$  states, with  $k$  being less than or equal to  $L-1$ . All the stages are respectively provided with aggregate metrics.
